ROVERengineering

We are looking for an experienced engineer who is passionate about testing and cares for the quality and details of products. We offer flexible working hours and afriendly environment for our employees. Maintaining a fun and friendly atmosphere for our employees is one of our main targets.

Job Type: Full-time

Location: Remote (UK)

Candidate Qualities:
- Attention to details
- Ability to tackle new challenges
- Creative
- Cares for user experience
- Continuous Improvement
- Cares a lot about delivering solutions with high levels of quality
- Eager and Quick Learner
- Flexible and doesn't mind exploring different platforms/paradigms/technologies
- Keeping an eye on new technologies and paradigms
- Loves to share knowledge with others and cares to listen to other people thoughts and achievements
- Out of the box thinker
- Open to receiving different opinions and defend his thoughts
- Passionate
- Product Oriented and not Task Oriented

Required Skills:
- Experience working in an agile/scrum development process
- Experience in the overall quality assurance process, quality pyramid, types of testing
- Capable of understanding and taking advantage of developer's unit and integration tests, to only cover with e2e automation and manual testing what's needed and will significantly improve quality
- Experience with one or more testing frameworks such as Playwright, Selenium
- Experience building test infrastructure integrated with CI / CD
- Capable of validating high level requirements and work with the team to generate all possible scenarios and rules based on product understanding
- Capable of writing test scenarios with one or more programming language

ROVERengineering

- Experienced in converting features into well-defined acceptance criteria that can be passed to development teams
- Strong knowledge of web development concepts
- Strong knowledge of mobile development concepts
- Strong knowledge on Web, Mobile and API testing
- Good knowledge about Rendering cycle and Browsers' compatibility
- Test UI interfaces and ensure that our interface is adaptive and works fine on different screen sizes and platforms and browsers
- Work with bug tracking tools to report clearly detected issues and replication scenarios and impacted areas
- Strong communication and collaboration skills for working across teams
- Desirable: Knowledge of performance and load testing tools (e.g., JMeter, LoadRunner)
- Desirable: Awareness of basic security testing principles to cover vulnerabilities like SQL injection, XSS, and authentication weaknesses (OWASP)

Optional Skills:

- Experience with performing security tests to find any security holes and report them
- Capable of navigating through open-source libraries code and modify or patch them if needed
- Open Source Contributor

Job Responsibilities:

- Design and maintain test architecture and automation frameworks
- Establish QA testing standards, best practices, and guidelines
- Lead CI/CD test infrastructure implementation
- Define automation strategy across unit, integration, API, and UI testing
- Generate comprehensive test strategies and scenarios
- Execute smoke, regression, and critical test scenarios
- Monitor and analyze test metrics for quality improvement
- Implement automated test suites for regression testing
- Review test plans and automated code from team members
- Work with development teams to improve code testability
- Ensure comprehensive testing of interfaces and interactions
- Validate requirements with product teams for testability
- Perform risk analysis to prioritize testing efforts
- Break down complex testing requirements into tasks
- Research new testing technologies and methodologies
- Mentor team members on automation best practices
- Lead technical design discussions for quality planning
- Share knowledge through documentation and training
- Communicate quality metrics and risks to stakeholders

- Analyze test results to identify systemic quality issues

Your Benefits:

- Competitive base salary
- Holiday entitlement: 25 paid holiday days per year, plus 8 public holidays (total 33 days off per year)
- Full remote work option with flexible hours
- Access to cutting-edge AI and productivity tools (e.g., ChatGPT Plus, Claude)
- Opportunity to join a growing company at an early stage and make a significant impact
- Direct involvement in shaping our expansion in the UK market
- Collaborative work environment with direct access to leadership

If you are interested in the job opportunity and you have the required skills needed and believe that you can achieve these responsibilities efficiently, please send your resume and portfolio, showcasing your technical skills, to **recruiting@roverengineering.co.uk** with title "**Applying for SeniorQA Engineer position**"
